# Milestone Report

The StratusLab project website http://www.stratuslab.eu/ is operational. The website provides or links to:

- StratusLab project news;

- Project presentations and events;

- Media coverage of the project;

- Source code, software and virtual appliance repositories;

- Project documentation;

- Contact information; and

- Internal project information for project members.

The website for the StratusLab FP7 project was inherited from the preceding StratusLab collaboration. The URL http://www.stratuslab.org/ was used for the earlier site and while this URL is still active, http://www.stratuslab.eu/ is preferred for the EU FP7 project.

The website is hosted at CNRS/LAL and the public content is managed by TCD. StratusLab project members can contribute to the website through a content management system.

## Future Plans

A number of additions and improvements are planned for the website:

- Better use of RSS feeds to provide project news;

- Integration with social media (Twitter).

We plan to collect statistics and feedback for the web site. To collect statistics we will make use of Google Analytics or a similar system. This will allow us to see where site visitors are coming from and what they are interested in.

In addition, it may be useful to provide a mechanism for users to leave feedback on the site e.g. with a comment box or 'I found this useful' button on each page.
