## “Hadronic charmonium decays”

- ✓ ---> BESIII: charmonium decay branching ratio we want ( $\eta_c \rightarrow p\bar{p}$ ,  $\Phi\Phi$ ,  $\psi' \rightarrow \chi_{c2}/\chi_{c1}\gamma$ ,  $J/\psi \rightarrow \eta_c\gamma$  e.g.)?
- ✓ BESIII ---> theory: What could we do with the lineshape?
- ✓ LHC/BESIII/Theory: what new channels should be measured?
