# Perspectives d'interfaçage TANGO

## ■ VUV monochromators:

- Systèmes destinés à être intégrés dans un environnement plus complexe (chambres échantillons, détecteurs, systèmes motorisés, ...)
- Systèmes complets intégrants moteurs, détecteurs, codeurs, ...
- Modularité des instruments

## ■ VUV Beamlines:

- De plus en plus de demandes pour des systèmes « clés en main »
- Service : fort intérêt d'une uniformisation des langages
