

Estimated Network Bandwidth for LCG-France sites

Fabio Hernandez

fabio@in2p3.fr

LCG-France T2/T3 Meeting
September 18th, 2006

Introduction

- Goal
 - Identify the network bandwidth needs for LHC data exchange for LCG-France sites
- Source
 - Chris Eck's estimated required resource table

Summary of Requested Bandwidth

Inbound [MB/sec]

Site	ALICE	ATLAS	CMS	LHCb	Total
CC-IN2P3	61	197	59	23	340
GRIF	9	20	38	0	67
LPC	4	1	0	0	5
Subatech	10	0	0	0	10

Outbound [MB/sec]

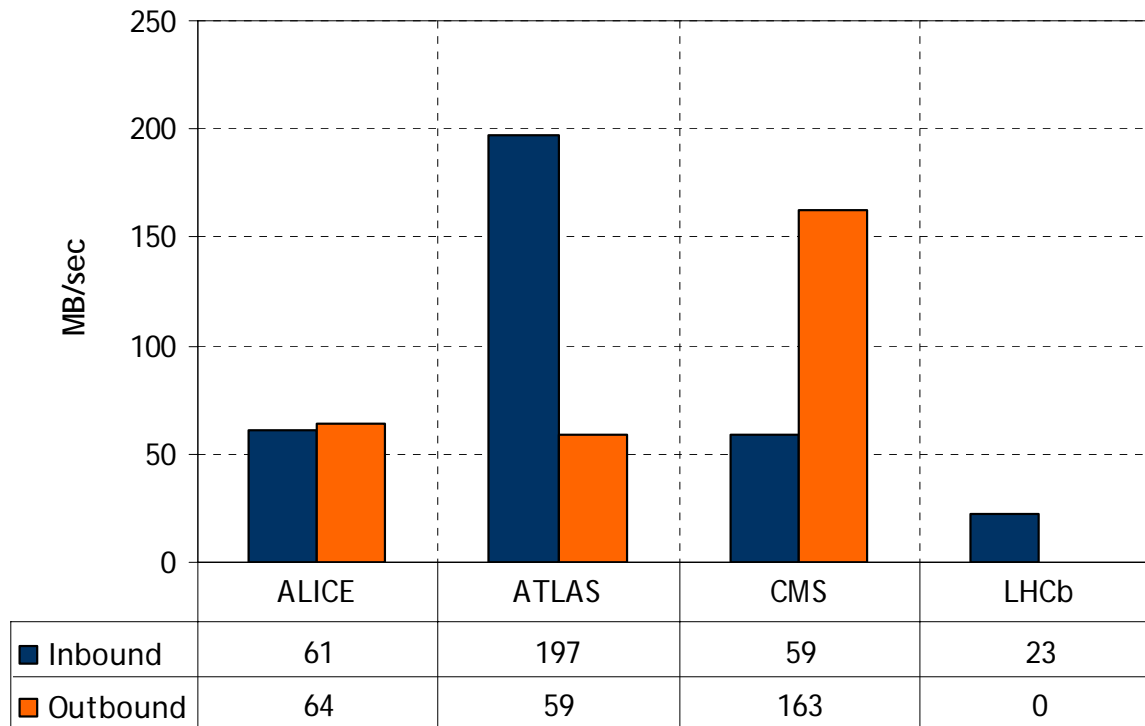

Site	ALICE	ATLAS	CMS	LHCb	Total
CC-IN2P3	64	59	163	0	286
GRIF	5	21	3	0	29
LPC	2	5	0	0	7
Subatech	5	0	0	0	5

These figures DO NOT INCLUDE the traffic inter Tier-1s. According to Chris' table it is estimated to be « T1 ↔ T1 498 MB/sec »

CC-IN2P3: Detailed View (1/3)

CC-IN2P3: Estimated Network Bandwidth for a Nominal Year per Experiment

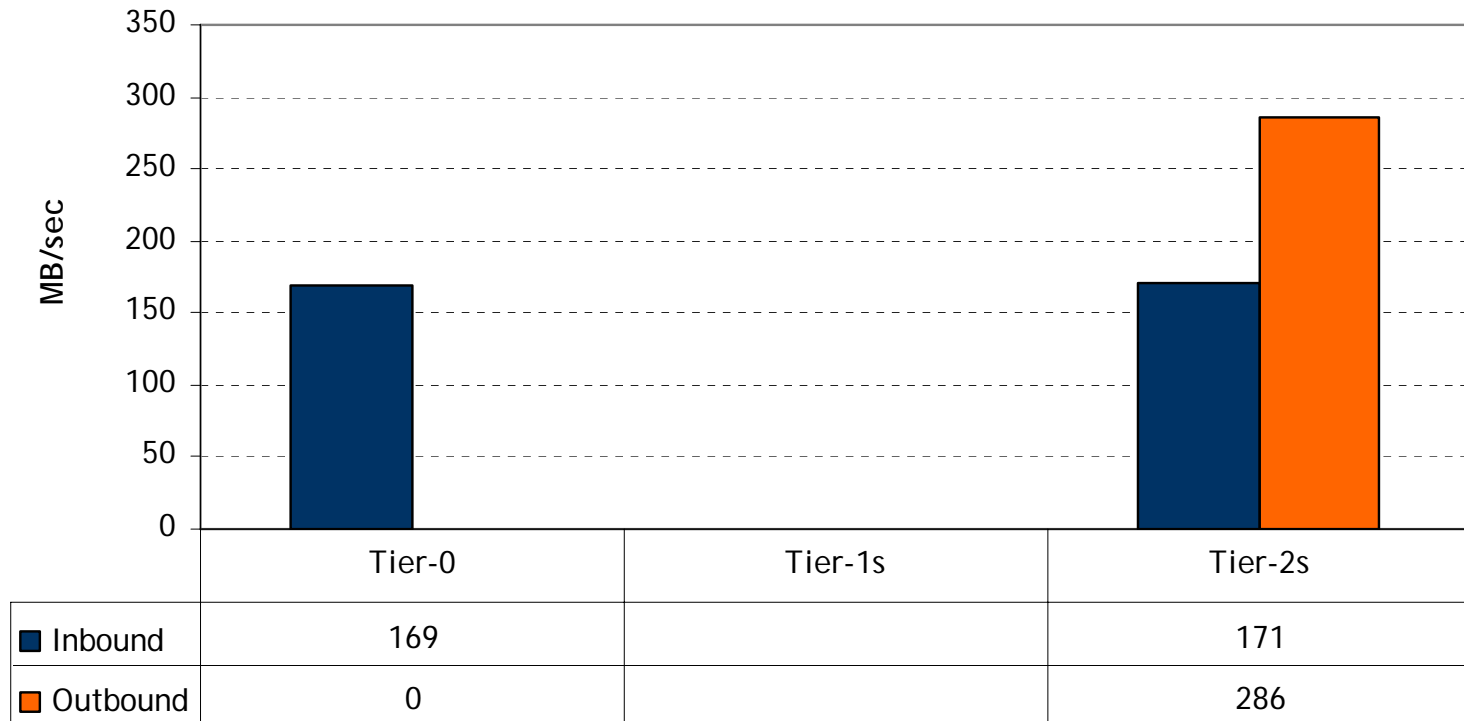

Number of unique sites to exchange data with CC-IN2P3:

Inbound: 9 sites
Outbound: 32 sites

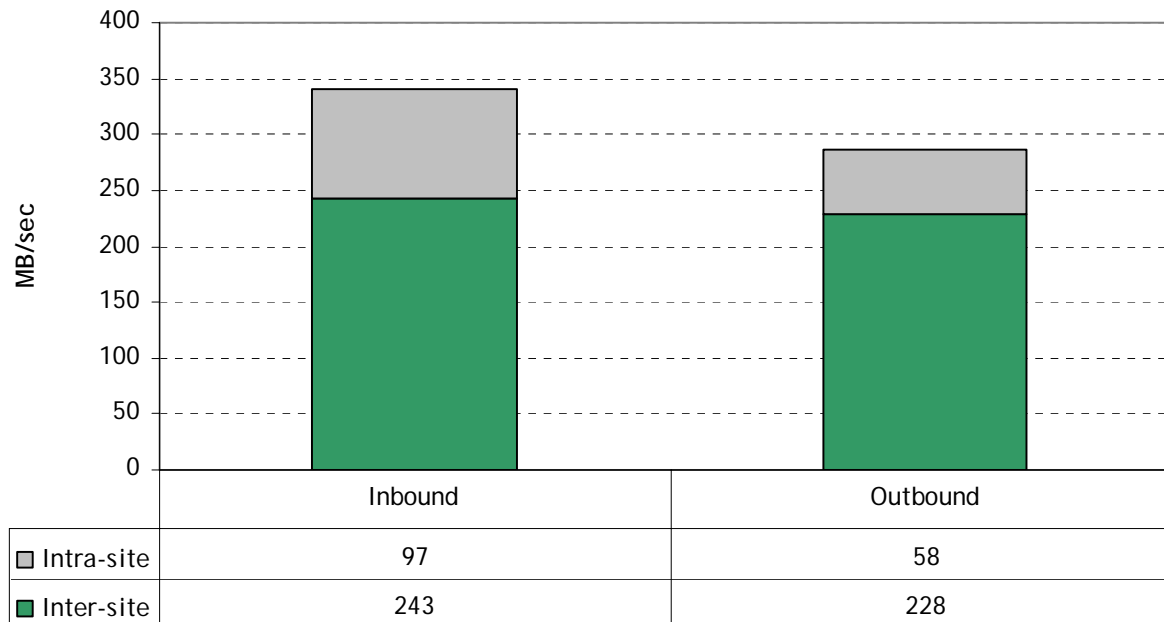

CC-IN2P3: Detailed View (2/3)

CC-IN2P3: Estimated Network Traffic for a Nominal Year per Site Category

CC-IN2P3: Detailed View (3/3)

CC-IN2P3: Estimated Network Traffic Intra- and Inter-site

This graph shows the fraction of the traffic internal to the site: between the Analysis Facility and the Tier-1.

From the network point of view, the difference is WAN vs. LAN.

From the storage point of view, we must consider the aggregate requested bandwidth

Conclusions

- We have now some estimated bandwidth requirements for LCG-France sites
 - Figures for Tier-1 are pretty worrying
 - Figures for Tier-2s sound reasonable
 - No figures for Tier-3s, but the ones for Tier-2s may be used for planning purposes
- What's next
 - All experiments, in particular CMS, are reviewing these figures, so expect some changes
 - Identify the inbound and outbound bandwidth for inter Tier-1 traffic
 - ♦ As detailed as possible (to/from disk, to/from MSS)
 - Use these estimates to start planning for the network links needed to absorb this traffic
 - ♦ Take into account the link efficiency
- See details in <https://edms.in2p3.fr/document/I-008769>

Questions
