

Laboratoire de Physique Subatomique et de Cosmologie.

19th January 2009

- ▶ Jean-Christian Anglès d'Auriac: DR at the cnrs coming from statistical mechanics and solid state physics, with an (old) experience in dedicated computer (end of the '80).
- ▶ Jaume Carbonell: DR at the cnrs, senior member of the **E**uropean **T**wisted **M**ass **C**ollaboration, co-author of several publications of this collaboration.
- ▶ Vincent Drach: PhD student, analysis of configurations with two and four flavors obtained by the ETMC collaboration, special interest for the baryon's spectroscopy.
- ▶ Pierre-Antoine Harraud: PhD student, analysis of configurations with two flavors obtained by the ETMC collaboration, special interest for the form factors and the Generalized Partons Distributions.
- ▶ Marianne Mangin-Brinet: CR at the cnrs, analysis of configurations (development of codes for contraction) and generation of configurations with 4 flavors in the framework of the ETMC collaboration.
- ▶ Mauro Papinutto: Joined the group in January 2009, very much involved in lattice calculation, member of several QCD collaborations (ETMC, Alpha, **G**insparg-**W**ilson **C**ollaboration, **S**outhampton**P**aris**Q**cd**R**ome)
